Chief Designer

Nils Luoma
Foreman in charge

Purchasing Dept

Olof Hermansson
Purchasing
Manager

Holger Moisis
Purchaser

Shipping

Henrik Joskitt

Kronoby Factory

Rurik Riska
Manager

NAUTOR specializes in building big sailing yachts of the highest quality. They are all designed to the I.O.R. Rule by the world-famous American naval architects Sparkman & Stephens.

The production programme of NAUTOR covers the yachts SWAN 37, SWAN 40, SWAN 44, SWAN 48, SWAN 55, and SWAN 65.

NAUTOR is the biggest boat yard in the world building offshore yachts from 40 ft upwards. The company consists of three separate factories together with more than 11.000 square meters (118.000 sq.ft) and 360 employees.

One of the reasons why the yard is placed in this particular part of Finland, is that skilled workmen are available in the environs of Pietarsaari, which is known for its hundreds of years boat building traditions. This combined with the long and wide experience of the architects Sparkman & Stephens and Nautor's know how is what makes the SWANS incomparable in the entire yachting world.

Where ever you live in the world it is not difficult to visit NAUTOR in Pietarsaari. Simply take a plane to Helsinki, which is only a couple of hours from London and Paris, and there are then six daily flight connections to Pietarsaari.

This is a brief description of NAUTOR. If you require more information, which we will gladly supply, please contact us or our agents shown below. If you are finding it difficult to make a decision for your new boat, why not visit NAUTOR and make the decision easier. Please call us or our agents!
