S&S Swan Smile

Dear S&S Swan Association Members, and Friends,

on hauling your S&S Swan, you may notice a fine crack in the paint along the keel/hull joint.
The so-called S&S Swan "Smile".
This is caused by different thermal expansion and contraction in the materials and causes no problem at all.
Please don't worry, if it gets too wide, it can be filled with micro balloons and faired.

S&S Swan "smile", a thin crack between GRP hull and lead keel

Christmas Greetings,

thank you very much to all Members and Friends who gathered in Milan for our Christmas party, and to Rigoni di Asiago for their super tasty "Nocciolata", the best Christmas present offered to all participants!

Nocciolata by Rigoni di Asiago, our Challenge Trophies in between, which will be awarded at the S&S Swan Rendez-vous (offered by Jonathan and Mimi Todhunter)
